Topics of Interest

Some possible themes we're interested in seeing abstracts on are:

- Any innovative research in vulnerabilities, exploits, mitigations and defense
- How bad are we owned, attacks and war stories
- Virtualization, OS, boot, and low level security
- Hardware security, CPU bugs, side channels, backdoors, front doors
- Advanced web security, identity vulns, authentication
- Cloud, networking, or protocol security
- Mobile, IoT, or critical infrastructure security
- Modern cryptography and attacks
- Anything that breaks the internet, or the world as we know it

BlueHat IL has an exclusive audience with professionals and leaders in this space. We recommend submitting advanced, technical talks over introductory ones.

A limited number of speaking slots are available, and all submissions will be reviewed by the content advisory board on a rolling basis until all speaking slots are filled.
